

## 8.8 Risk assessment for indoor and outdoor environment

### Policy statement

At Flying Start we want our children to have the interest and enthusiasm to try out and access the play equipment we have indoors and outdoors. While they use our equipment and play materials we aim to enrich children's learning and help them to start managing their own risks. We aim to provide equipment that gives both familiar and new experiences and challenge the children to try our new things.

Our accident book will alert us of any reoccurring problem areas in our environment.

Our aim is to be safe but challenging.

### Indoors

Risk identified	Who is at risk	Level of risk	Control measure and persons responsible	Review
Safety of Indoor equipment	chn	low	Equipment is set out and put away daily so any damages or inappropriate equipment is dealt with on a daily basis.	
Cleaning of premises	Chn and staff	low	Contract cleaner cleans toilets, cloakroom, kitchen and empty bins every day. Floors are cleaned once a week by caretaker. Flying start staff sweep up and mop any spillages instantly.
